OR

Off-Site Sessions – “A Continuum of Career & College Pathways”
(choose one) – Each off-site session requires a non-refundable \$10 fee. A minimum of 10 registrations is required to confirm each session. If a session does not fill, your registration will be transferred to a confirmed session.

1. ***West-MEC/Estrella Mountain Community College - Southwest Campus:*** During this on-site session, conference participants will learn about a unique, national model campus, where high school students and college students co-exist to fast track degree completion. The campus offers hands-on electrical, mechanical, instrumentation and robotics labs. The state of the art labs include mobile trainers where students are able to put theory to application. Our instructors are industry experts and ensure that students are receiving 85% of their education in labs and not simply in the classroom via textbooks. These lab spaces provide students the opportunity to gain practical and extensive hands-on job related skills on industry related equipment. Our students earn several nationally recognized certifications through our programs.

2. ***University of Phoenix Stadium*** - Discover why University of Phoenix Stadium is recognized as one of the top multi-purpose sports & entertainment facilities in the country and a marvel of engineering, technology, and design. The tour is a "behind the scenes" look of the areas rarely seen by the public and some of the unique operational features of the only stadium in North America with a roll-out natural grass field and retractable roof. The tour is professionally guided by the stadium's knowledgeable and friendly tour guides. The 75 minute experience involves approximately 1 mile of walking throughout the facility along with a video presentation about the stadium's construction. The entire tour route is fully ADA accessible. Wheelchairs are available and tour guests may bring their own as well. Please be aware that elevators will be utilized during tours. Various possible careers will also be discussed throughout the tour.

3. ***Peoria Fire Science and Law Enforcement Partnerships @ Glendale Community College*** - During this on-site session at Glendale Community College, conference participants will learn about a nationally recognized Program of Study for Peoria Unified School District's Fire Science Program. High School Instructors are active duty Fire Fighters. There are six different stackable credentials in Fire Science. Both Law Enforcement and Fire Science share a robust advisory council. Participants will tour unique campus that offers hands-on Fire Science and Law Enforcement activities in preparation for academy entrance.

5:00 Evening on Your Own

Tuesday, May 15
